

To our workshops

Field Action 10-105 Level 3 Customer notification Introduction

Think has decided to implement a Field action on the valves in the wheels. The reason for this field action is that it turns out that the quality of the valves varies.

This applies for 184 vehicles in the range of VIN no: YYCFT26B1AU005055 to YYCFT26B9AU005269

See attached photos. The picture to the left shows a defective valve, the image at right shows one that is in order. The cracks in the valve can be identified by bending the valve. Unless there is something wrong do not do anything with the valve. If the valve is not in order:

Remove the tire from the rim.

Remove old valve.

Spare Part: recommended specification of replacement valve
ALLIGATOR TR 413. Artikel Nr 522445.

Replace new valve

Be sure not to damage the rim when the valve is mounted.

Mount the tire on the rim and balance the wheels.

We ask that this be carried out as soon as possible.

Time

Handling and control time per vehicle. 0,25 hour

Time:0,25 hour per valve must be replaced.

Administration

The workshop fills out a regular claim report (AS&S process manual Z8 Warranty Report and application form) referring to this Field Action, and send this to THINK with the invoice for the elapsed working hours and the completed feedback form.

Time plan

Field action is valid from June 21, 2010.
